

“Your Premier Supplier For Sheet Extrusion”

GEM Plastics is proud to present **GEMMedical®**, our high grade Anti-microbial HDPE sheet ranging from .200” to 1.25” thick for use in laboratory, medical and research industry.

Why **GEMMedical®**?

Because, germs cause disease and spread illness. **GEMMedical®** comes with our patented Anti-microbial defense additive **GEMGuard®**. This additive makes the HDPE non-conductive to microbial germination and growth. **GEMGuard®** has been proven to reduce bacterial contamination by 99.3%.

Why GEM Plastics? We stock over 2 million pounds of sheet in our own warehouse, operate our own trucks, and are home to the friendliest customer service around.

Want to make your project
safe and durable?
Make it a GEM!
